

# Keeping you SAFE at your clinic visit during COVID

COVID-19 has changed the way we work, but it hasn't changed our commitment to your health and well-being. We have every precaution to keep you safe while in our office.

## Face coverings

Bring and wear your own cloth face covering when you are in our office.

## Temperature checks

We will take your temperature when you arrive at our office. Stop at the front desk upon entering the building.

## Screening questionnaire

We will ask a few screening questions to reduce the risk of spreading COVID-19.

## Social distancing

You will notice there is only seating for **4** patients in our waiting room. Adult patients may not have a support person accompany them. Pediatric patients may have **1** support person with them. Siblings should not attend the visit.

## Cleaning precautions

We have increased routine cleaning and disinfection procedures in every area of the office. Each exam room is disinfected before and after each patient. All common areas are disinfected several times a day.
